

ABSTRACT COMPOSITIONS

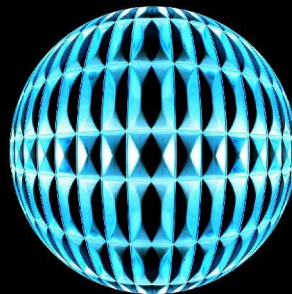

CHARLINE LANCEL

The work of Charline Lancel come from a luminous idea, a certain taste for a classy atmosphere. The most beautiful stories that we will be able to experience will be the most beautiful stories that we will be able to imagine. To arouse the imaginary is an art in itself. To intrigue, to surprise, to entertain by the creation of abstract compositions and the search for perfect shapes in proportions, colors, subtlety and simplicity. An eye looking for pure and elegant lines, distinguished curves, a sensation of purity, a minimalism that is majestic like a white lily, which holds itself proud and gracious. Solar desires, white expanses like the snow, the lights that illuminate life, because we all need luminous images. A positive attraction. Like a planet which makes your head spin. Universal, intemporal, intergenerational, without prejudice, freedom at all cost. Images which surround us are the inspiration of our happy days. A palette of colors at will. An ability to adapt for the art of love. A work of art that is a sensation every morning, a new story to be taken along the way, a road to be traveled hand in hand. A galactic journey, a rest for the mind, a tribal object, a sacred plenitude.
